

GET CRISIS CAPITAL FOR BUILDING UPGRADE PROJECTS

Property Assessed Clean Energy (PACE), a state-level government program available throughout the U.S., can in many locations now be used to replenish cash accounts to help houses of worship get through these hard times. This public-private partnership between local governments and private lenders is available to any building owner that has completed a qualifying project within the last 2 to 5 years. Qualifying projects include HVAC, lighting, roofing, renewable energy, energy efficiency, and in some cases earthquake and hurricane resiliency related installation and construction.

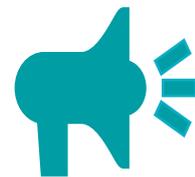

Take Advantage

Previous facility upgrades qualify for PACE, and you can receive cash.

Contact us to learn if your previous projects qualify for PACE financing.

If qualified, the money you receive can be used for paying staff, paying bills, loans, etc.

HOW IT WORKS:

Blessed Tomorrow's Unety program provides ecoAmerica members with access to a special government-backed financing program for refinancing qualified projects that were completed within 2 to 5 years, depending on your location. These funds can be used to replenish your cash account so that you can continue operating and avoid layoffs during these hard times.

Step 1 - enter your property address to immediately get preapproved

Step 2 - complete the 5 minute application

Step 3 - compare quotes from multiple lenders that are registered with the government

Step 4 - finalize your contract terms and receive the funds

Case Study

From 2013 to 2015, the owners of 3700 Giddings Rd in Orion, MI completed a series of building improvements totaling more than \$435,000, paid for from their capital reserve accounts.

In 2016, they learned that they could refinance these projects with sustainable financing that promised low fixed-rates and long terms, greatly improving the cash balance of their working capital accounts. After securing the financing, the owners were able to accelerate energy savings cash flows from the projects, achieving \$40,000 in annual cash balance improvement.
